

D² two or more acryloyl groups or methacryloyl groups in the molecule and 5 to 100 parts by weight of an epoxy resin based on 100 parts by weight of the polyvinyl acetal resin.

12. (Twice Amended) The adhesive composition for a metal foil according to any one of Claims 7-11, wherein said composition further comprises at least one filler selected from the group consisting of silica, alumina, aluminum hydroxide, magnesium hydroxide, talc and organic filler.

D³ 13. (Three Times Amended) The adhesive composition for a metal foil according to any one of Claims 7-11, wherein said composition further comprises at least one of an antioxidant, a metal scavenger and a lubricant.

14. (Twice Amended) An adhesive-coated metal foil which is obtained by coating the adhesive composition for a metal foil according to any one of Claims 7-11, as a varnish on one of the surfaces of the metal foil and drying.

D⁴ 20. (Twice Amended) The adhesive composition for a metal foil according to Claim 7, further comprising a curing agent for the at least one of the polyfunctional acrylate compound and the polyfunctional methacrylate compound.

Please add the following new claims to the application:

~~22~~ 22. The adhesive composition according to Claim 1 or 3, adapted for adhering said metal foil to a substrate.

23. The adhesive composition according to Claim 1 or 3, adapted for adhering a copper foil of a copper clad laminated wiring board to a prepreg of the wiring board.

24. The adhesive composition for a metal foil according to any one of Claims 1 and 3-6, wherein said composition further comprises at least one filler selected from the group consisting of silica, alumina, aluminum hydroxide, magnesium hydroxide, talc and organic filler.

25. The adhesive composition for a metal foil according to any one of Claims 1 and 3-6, wherein said composition further comprises at least one of an antioxidant, a metal scavenger and a lubricant.

26. An adhesive-coated metal foil which is obtained by coating the adhesive composition for a metal foil according to any one of Claims 1 and 3-6, as a varnish on one of the surfaces of the metal foil and drying.

27. The adhesive composition for a metal foil according to Claim 1 or 3, further comprising a curing agent for the at least one of the polyfunctional acrylate

D^S compound and the polyfunctional methacrylate compound.--
